

PVC INTERIOR PANELS

GRACE®
Baltic

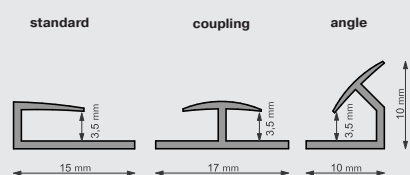

QUICK RESULTS AT MINIMAL EXPENSES

Interior PVC panels can be used both in the city and in the countryside for the decoration of utility rooms, balconies, bathrooms, kitchens, corridors, etc. You can radically improve the look of a wall or a fragment of it by simply gluing panels to it. GRACE decorative panels are made of PVC sheets painted by abrasion-resistant paints manufactured in Germany.

Components are mould-pressed, which grants them their 3D texturized pattern. Panels are made of durable and sustainable PVC (polyvinylchloride) – a water-proof and flash-resistant material (B category). Panels should be glued to a dust-free surface using specialized Universal Valo Glue or liquid nails. The panels can be easily scissor-cut. The product is barcoded.

Grace manufactures both standard range of products which is being constantly widened, or custom made products (having exclusive shapes, patterns, or under a private trademark). In order to help customers complete the design of their premises and facilitate the installation of panels.

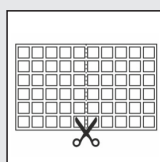

Three types of profiles

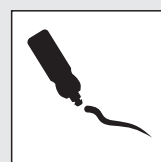

Installation guidelines

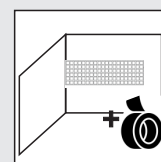

clean the surface

mark up and cut

apply glue

fix with stick tape for 20-30 min

Display stand
